Professional Summary

Aspiring AI/ML Engineer currently learning machine learning, deep learning, data analysis, and backend API development using Python. Hands-on experience through self-built projects in image classification, NLP, predictive modeling, and deployment using TensorFlow, Scikit-learn, Pandas, Streamlit, and FastAPI. Strong foundation in algorithms, statistics, and building practical AI solutions. Passionate about solving real-world problems using data-driven systems and continuously improving technical expertise.

Technical Skills

Language:

Python

ML / AI:

Scikit-learn, TensorFlow, Keras, Pandas, NumPy

Backend / API:

FastAPI

Data Visualization:

Matplotlib, Seaborn

Tools & Platforms:

Jupyter Notebook, Google Colab, Streamlit, Git, GitHub, VS Code, Kaggle

Core Concepts:

Supervised Learning, Classification, Regression, Clustering, CNN, NLP, Model Evaluation, Data Preprocessing, GAN, Prompt Engineering, RAG Pipeline

Projects

Monkey Species Classification System

- Developed an image classification model using Convolutional Neural Networks (CNN) to classify 10 monkey species.
- Applied data preprocessing, augmentation, and model tuning techniques.
- Achieved strong validation accuracy using TensorFlow and Keras.

Sentiment Analysis using NLP

- Built a machine learning model to classify text reviews as positive or negative.
- Used TF-IDF vectorization and Logistic Regression.
- Improved text preprocessing and prediction performance.

Streamlit ML Web Applications

- Created interactive web apps for machine learning predictions using Streamlit.
- Integrated trained models with user-friendly interfaces for real-time predictions.

FastAPI Backend Applications

- Built REST APIs using FastAPI for machine learning model integration and backend services.
- Developed endpoints for prediction systems and efficient data handling.

Education

National College of Computer Studies
Bachelor in Information Technology Management

Achievements

- Strong understanding of machine learning workflows and deployment.
- Active learner focused on AI engineering and real-world application building.

Additional Information

- Strong problem-solving and analytical skills
- Quick learner with self-driven mindset
- Interested in AI Engineering and Deep Learning
